

On simultaneous number systems with 3 bases

Tamás Krutki, Gábor Nagy

ELTE IK, ELTE IK Department of Computer Algebra

krtamas@inf.elte.hu, nagy@compalg.inf.elte.hu

This talk is about the search for simultaneous number systems with 3 bases. We showed that there are such number systems in the ring of integers of the quadratic field $\mathbb{Q}(\sqrt{5})$ with two different digit sets.
